Summary

Computer Engineer and Software Developer with hands-on experience in Odoo ERP development and full-stack web development. Skilled in building custom ERP modules and web applications using Python, JavaScript/, React, and Next.js, with practical experience in databases, APIs, and responsive UI development.

Education

Bachelor in Computer Engineering, Pokhara Engineering College/Pokhara University 2021 – 2025
Courses: Operating Systems, Computer Architecture, Advanced Web Development, Pokhara, Nepal
Data Structures and Algorithms, Programming Technology, Data Mining, E-commerce, NLP

Experience

Independent Software Developer 2023 – 2026
Pokhara

- Self-directed learning through hands-on development with JavaScript/TypeScript, React, Next.js, Flutter, databases, and APIs.
- Built and deployed multiple independent applications while developing practical skills in full-stack development, authentication, databases, and responsive UI.

Odoo / ERP Developer, Eminence Ways 2026 – Present
Kathmandu

- Developing custom Odoo 19 ERP modules using Python, PostgreSQL, XML, JavaScript, and OWL.
- Built features across HR, attendance, leave, payroll, performance, dashboards, and reporting.

Projects

N-GVLH (Next-Gen Virtual Learning Hub) 📄, Next.js, MongoDB, AI Integration, Stripe
Built a full-stack learning platform with interactive courses, live teacher interaction, personalized announcements, Stripe payments, AI-powered Q&A, and smart search.

RealTime Collab 📄, Next.js, React, TypeScript, Convex, Clerk
Developed a real-time collaborative workspace with document/code editing, interactive whiteboards, AI chat summaries, and organization-based access control.

Dental Clinic Website 📄, Next.js, TypeScript, Tailwind CSS
Designed and deployed a production website for a dental clinic with responsive UI, branch-specific content, service pages, contact forms, WhatsApp/call integration, and Google Maps.

Bingo Caller 📄, HTML, CSS, JavaScript
Built a browser-based 1–90 bingo caller for company events with randomized drawing, draw history, undo/redo, customizable animations, sound effects, themes, keyboard controls, and number announcements.

RAWG Clone 📄, React
Created a game discovery platform using React.js with search and filter features.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, HTML, CSS, C, C++, Java, Dart
- **Frameworks & Libraries:** Odoo, React.js, Next.js, React Native, Flutter
- **Backend & Database:** PostgreSQL, MongoDB, Firebase, REST APIs
- **Tools:** Git, GitHub, Docker, Linux, VS Code
